EDUCATION

Indian Institute of Information Technology, Bhopal

Aug 2023 - May 2027

Bachelor of Technology in Information Technology (IT)

CGPA: 8.18

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering.

PROFESSIONAL EXPERIENCE

VedaAI - Full Stack Developer Intern

Feb 2026 - May 2026

- Cut manual grading workload by **30+ hours/month** by building and shipping an automated AI-grading pipeline end-to-end, integrating **LLM APIs** into a **Node.js** backend to process **200+ student assignments**.
- Defined **15+ REST API endpoints** and **MongoDB** schemas for AI-powered assessment workflows, integrating **LLM APIs** with frontend applications and reducing average API response times by **20%**.

Grasim Industries (Aditya Birla Group) - Intern

Dec 2025 - Jan 2026

- Cut certificate processing time from **5 minutes** to **20 seconds (95% reduction)** by automating generation and assignment workflows end-to-end in **Power Automate** across **3 user roles** and **4 core modules**.
- Enabled real-time reporting visibility by architecting backend data flows between **Power Apps**, **Dataverse**, and **SharePoint**, implementing secure role-based access control for trainee management.

XPLOIT Club, IIIT Bhopal - CTF Master

July 2025 - Present

- Scaled **2 CTF events** to **350+ participants** by independently designing and deploying **20+ challenges** across Reverse Engineering, Binary Exploitation, Web Security, Cryptography, and Digital Forensics.
- Trained **200+ students** in **Offensive Security**, **Network Security**, **OSINT**, and **Digital Forensics** through hands-on workshops featuring practical challenge environments and real-world security exercises.

PROJECTS

ASTRA - Advanced System for Threat Recognition and Analysis

[Live](#) | [GitHub](#)

- Built a malware APK and phishing URL detection platform using **React**, **TypeScript**, and **FastAPI**, engineering a 4-dimension risk engine to flag **12+ dangerous permissions** and generate **0-100** risk scores.
- Architected and deployed a full-stack security scanner with **Docker**, automating APK metadata extraction and URL phishing checks (HTTPS, TLD, SSL) into **10-25 second** scan reports with 3-tier verdict classification.

CashChat

[Live](#) | [GitHub](#)

- Built an AI finance dashboard converting natural language to SQL via **Google Gemini API**, with a custom SQL safety validator blocking injection attacks and unauthorized schema access, validated across **10 adversarial test cases**.
- Architected a full-stack platform with **Next.js**, **TypeScript**, **PostgreSQL (Prisma ORM)**, and **Redis**, shipping **7+ REST API endpoints** and OAuth-secured (Google/GitHub) dashboards for **500+ transactions**, using a **1-hour Redis cache** to cut redundant LLM calls and boost query performance.
